Galapagos Rockford Charter School is dedicated to preparing scholars to be responsible, productive, college educated adults capable of adapting and prospering in a changing global economy.

December 13, 2021

Galapagos Staff and Parents:

This is notification in accordance with Illinois and Federal Asbestos Regulations, that a copy of Galapagos Rockford Charter School's Asbestos Management Plan for the Lower and Upper Academies may be viewed by appointment during school hours. By law, Galapagos Rockford conducts a comprehensive asbestos inspection every three years. The last 3 year inspection was completed in December 2019. We also conduct semi-annual inspections twice a year with a certified inspector. The most recent one was conducted in December of 2021.

We take the health and safety of our scholars very seriously. Accordingly, we conduct regular inspections to ensure that any materials containing asbestos are properly contained and do not pose a hazard. While most buildings built before 1970 contain some asbestos, there are ways to contain it and eliminate any risk to staff and scholar health. If you have any questions, please contact Blake Kennedy at (779) 368-0852 ext. 641.

Sincerely,

Blake Kennedy
